

## **Costs and Limitations of Certified Health IT**

### **Allscripts Lab**

Allscripts Lab requires a flat one-time implementation fee for each Public Health Interface to submit data electronically to Public Health agencies and annual maintenance fees per interfaces. Annual maintenance fees are used to enable the transmission of reportable laboratory tests and values/results to public health agencies. In addition, there may be one-time training and implementation fees which vary based on the number of facilities. The fees, if not previously purchased, are used to implement and configure transmission of electronic laboratory tests (170.315(f)(3) for 2015 Edition certified products; 170.314(f)(4) & 170.314(b)(6) for 2014 Edition certified products). The customer must sign a contract to license this product, but there are no additional contractual limitations. The only practical limitations are exchanging lab information with agencies that either don't accept standard HL7 formats, or they require what would otherwise be optional information that Allscripts Lab does not supply.
